Professional Summary

Backend-focused Software Developer with hands-on experience building secure and scalable web applications using Java, Spring Boot, React.js, JWT Authentication, and MySQL. Skilled in RESTful API development, database integration, authentication systems, and backend optimization through internships and academic projects.

Education

Stella Mary's College of Engineering

Bachelor of Engineering in Computer Science and Engineering — CGPA: 8.2/10

Kanyakumari, Tamil Nadu

Nov 2021 – May 2025

Experience

Java Developer Intern

Jun 2024 – Jan 2025

Feathers Softwares

Nagercoil

- Delivered 2 backend modules for the ShopEase e-commerce platform using Java and Spring Boot to improve scalability and maintainability.
- Configured JWT Authentication and Spring Security to secure 6+ RESTful APIs and improve endpoint protection.
- Designed cart management and order processing APIs to streamline transaction workflows, enhanced API performance, resolved backend issues, and collaborated with frontend developers and testing teams to ensure smooth API integration and application functionality.

Software Developer Intern

May 2023 – Nov 2023

Iconic Cognition

Nagercoil

- Engineered Java-based modules for the VisionInspect Image Validation System to automate filtering and validation of 100+ images.
- Applied 3+ image validation filters including size, format, and clarity checks to improve image processing accuracy.
- Managed image metadata and validation records using MySQL database integration for efficient tracking and retrieval.
- Enhanced backend workflow automation, reducing manual image verification effort by 40% and improving processing efficiency.

Projects

ShopSphere — Java, Spring Boot, JWT, Razorpay API

Nov 2024 – Mar 2025

- Developed and optimized 10+ RESTful APIs for authentication, product management, and order processing using Spring Boot and MySQL.
- Implemented JWT Authentication and RBAC using Spring Security to secure 10+ application endpoints and improve backend security.
- Integrated Razorpay payment gateway, deployed backend services locally using Spring Boot, and tested RESTful APIs using Postman for validation and debugging.

TaskBuddy - Task Management System — React.js, Spring Boot, REST APIs

Jan 2024 – Apr 2024

- Built a full-stack task management application using React.js and Spring Boot with secure CRUD operations.
- Developed and secured 5+ REST APIs with authentication and authorization mechanisms.
- Integrated MySQL database for efficient task storage and backend data management.

DriveEase - Car Rental Management System — Java, Spring Boot, MySQL

Jan 2023 – Apr 2023

- Implemented backend modules for vehicle booking and management using Spring Boot and MySQL.
- Created 5+ REST APIs for booking operations, vehicle availability, and customer management.
- Managed 100+ booking and vehicle records with efficient database operations.

Technical Skills

Languages: Java, JavaScript

Frontend: React.js, HTML5, CSS3

Backend: Spring Boot, Spring Security, REST APIs, JWT Authentication, RBAC, Hibernate, JPA

Database: MySQL, Oracle SQL

Core CS: OOP, Collections Framework, Exception Handling, JDBC, Multithreading, Data Structures

Tools: Git, GitHub, Postman, Maven, Docker basics

Concepts: MVC Architecture, API Integration, Authentication, Authorization, SDLC

Certifications

- Full Stack Development using Java | Ethical Hacking - NPTEL
